

# DIDS BUR Y PIONEER

VOL XXXI. No. 81.

DIDS BUR Y, ALBERTA, THURSDAY, AUGUST 2, 1934

\$2.00 per year. 5 cents a copy.

## No Properties Sold at Tax Sale

At the Town Tax Sale held Tuesday under the provisions of the Tax Recovery Act, no property was sold.

No properties on which the owners are living will be sold by Private Sale before the expiration of one year from the date of the Public Auction Sale. After the expiration of one year the town will take title to those properties which have not been, in that time, redeemed.

Ratemakers are accordingly urged by the Town Council to pay their arrears of taxes as soon as possible and have their properties redeemed.

## School Board Meeting

At the regular meeting of the school trustees last Monday night it was decided to operate only four rooms in the public school and close the one formerly taught by Miss Black. This plan will be given a thorough trial and if found to be unsatisfactory an extra teacher will be engaged.

The matter of repairs took up the balance of the meeting. It was decided to kalsomine the interior of the high school building and varnish window ledges in the public school. The one old floor downstairs in the public school will be taken up and a hardwood floor put in to complete new hardwood floors throughout the downstairs section of the building. The cement sidewalks in front of the school will be rebuilt.

School will commence on Tuesday, September 4, it was agreed.

## Welcome Rain.

The three hours' heavy rainfall which set in at 2 a.m. Tuesday following the windsor storm proved very welcome to Didsbury farmers.

The grain was very badly in need of the rain, and a much better crop prospect is now looked for by local agriculturists.

## EVANGELICAL NOTES

The subject of the sermon at the Evangelical Church service on Sunday morning will be, "Go, Compel, Fill."

Don't fail to hear Eddie Clemens and his snappy Elks orchestra at the Sports day dance next Wednesday night.

## Legion Memorial Service

The annual memorial service of the Didsbury branch of the Canadian Legion will be held on Sunday August 12 at 3 p.m., at the Memorial Hall. All returned veterans of the district are requested to assemble at the Oldfellow's Hall at 2 p.m. Fall in at 2:30. The march to the Memorial will be headed by the Didsbury Boys Band. Medals will be worn.

The public are cordially invited. During the Service opportunity will be given for the placing of flowers at the base of the Memorial.

It is hoped that all ladies present will remember this annual tribute.

## Another Silver Medal Jersey.

"Arizona's Maid Mary No 5380S" just completed a record of 10,498-lbs of milk and 650-lbs of fat, thereby gaining another silver medal for Didsbury Jersey Farms.

"Didsbury Sultan's Belle, No. 67-116" commenced a record at 1 year of age on May 23, was not 2 until June 21. In June she gave 1,217-lbs of milk and 82.79-lbs of fat. This 82-lbs of butter per day, and the heifer only weighs approximately 550-lbs.

## Entertained at Bridge.

Mr. Melvyn Hugel of the Royal Bank of Canada staff at Wainwright, Alta., was entertained last Thursday night when Mr. and Mrs. Thomas Finley gave a party in his honor.

The evening was spent at bridge with Miss Aileen St. Clair winning where he will now be employed. Mr. E. J. Sharman was presented with a set of pipes and case by the Didsbury Boys Band of which he was an active member.

Mrs. Finley donated considerable of his time to the band and had the responsibility of teaching and leading the bass section. He will be greatly missed by the band when fall work commences.

## Cuts 60-Day Oats.

The guest of honor, Mr. Melvyn Hugel, concluded his vacation with friends at Sylvan Lake, returning to his duties at Wainwright on Monday.

—

Mr. Tom Murphy of Westcott yesterday informed us that he was cutting his 60-day oats which he sowed on May 3rd.

## Farmers to Organize Telephone Company

At a meeting held at Community Hall last Friday night, the farmers of east town decided to organize a company to take over the rural telephone lines in this district. Mr. W. J. Scheidt was elected chairman of the meeting while Mr. J. Boorman and Mr. H. C. Remmington represented the Alberta Government Telephones.

It was decided to meet with the farmers west of town after they had met and appointed the committee.

The committee appointed to represent the east district is composed of: Messrs. John Topley, Chairman; C. J. H. Dikken, Ed. Blom, Ed. Liedeker, Chas. Deardick, W. D. Archer and W. J. Scheidt.

A meeting of the west subscribers will be held next Monday evening, August 6th, in Melville school at 8 o'clock p.m. to discuss the formation of a farmers' telephone company. Mr. A. Higgins of Calgary, commercial manager of Alberta Government Telephones will address the meeting.

It is expected that joint meetings of the east and west district subscribers will be held in town when final arrangements will be concluded.

## Departing Bandsman Given Presentation

Prior to his leaving for Red Deer where he will now be employed, Mr. E. J. Sharman was presented with a set of pipes and case by the Didsbury Boys Band of which he was an active member.

Mrs. Finley donated considerable of his time to the band and had the responsibility of teaching and leading the bass section. He will be greatly missed by the band when fall work commences.

## Ships Out Carload of Butter.

The first carload of butter sent out by the Crystal Dairy here, on Saturday, July 21. This car, containing 20,720 pounds of butter was shipped to the Central Creameries Ltd. at Vancouver B.C.

Although the local dairy ships butter to Calgary daily, it is thought that this is the first time a full carload has ever been shipped direct.

## Young People Enjoy Camp

The Young People's Camp conducted by the Evangelical League of Christian Endeavor of Zion Evangelical Church from July 23rd to 29th at the Little Red Deer River west of Westcott, was greatly enjoyed by the 45 young people who attended and also by the many visitors who went out from town from time to time.

A special service for the benefit of the community was conducted Friday evening with about one hundred in attendance. The service was preceded by a ball game between the community team and the camp team, the score being 11-6 in favor of the camp. There were four periods of study each day as follows:

"The Disciples of Jesus," by Rev. W. M. Koenig; "Evangelical Missions and Missionaries," by Miss Ida Rupp; "Christian Devotion," by Rev. H. J. Wood; and "The Apostles Paul," by Mrs. Otto Harder.

Each afternoon from 2 to 5:30 was given over to recreation, and each day closed with a camp fire and vesper service.

## Camp Meeting

The annual Camp Meeting of the M.B.C. Church closed on Sunday evening. The camp was well attended from the first to the last and all who made the effort to attend were well repaid for their effort.

The evangelist, Rev. J. A. Beery, brought deep, heart searching messages from the Word, and many received spiritual help and thereby are enabled to go out and more successfully cope with the problems of the present day.

On Wednesday afternoon Mr. W. B. Zook of the Alberta Prohibition Association addressed a fine audience and presented the general program, including the educational, evangelistic, legislative and reformative branches of the association.

The atmosphere surrounding the encampment was beautiful, peace and order prevailed, proving that Didsbury people respect gatherings of this nature.

We thank one and all for their hearty co-operation and pray that God will bless in the coming days all who call upon His name.

The recent addition to the Bible School building proved a great boon in the accommodating of visitors — Rev. F. Vincent, Pastor

Miss Marie Chambers has as her guest during this week, Miss Mabel Thompson, of Calgary.

## Didsbury Eliminated in Heavy Hitting Game

Scoring six runs in the ninth inning and slugging the offerings of George Geiger all over the pasture, Hainstock eliminated Didsbury from the baseball league playoffs in a heavy slugging game that had the fans on edge throughout last Thursday night.

After taking the visitors in 1,2,3 orders in the first frame, Didsbury stepped out and scored two runs when Bersch got base on balls and exchanged home by Bob Goender who singled out the longest hit of the game well into the tennis courts for a home run.

Hainstock started another four in the fourth but again failed to hold the lead as Didsbury scored three times in the fifth and four more in the sixth. The seventh stanza was scoreless so that the home batters had a three-run margin going into the eighth frame.

Hainstock collected two counters in the inning to none by Didsbury, and went into the fatal ninth with the determination to score and tie up the game. They did it, and how! Cho Rupp singled out a three-bagger, Alan scored Rupp on a single, Miller and Dutch Ross both hit safely to fill the bases and Wilkinson cleared the deck first on a double's choice and romped home on a safety by Jackson to end the scoring. Didsbury slipped over one more home run in their half of the ninth to make the final score Hainstock 16, Didsbury 12.

Bob Goender was the big noise for Didsbury in getting a home run, two triples and a walk in five trips to the plate. Wilkinson of Hainstock was runner up for batting honors with a home run, triple and two singles. George Geiger allowed 10 hits and fanned 10. Hainstock slugged while Cole for the visitors gave 4 hits, fanned 7 and walked 3.

**Fine Quality—Black—Mixed—Green**

# "SALADA"

**TEA**

"Fresh from the Gardens"

**Object-Lesson Of Peace**

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a beligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or nations could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost incalculable benefit to Canada. Billions of dollars of American money has been invested in this country. Hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upholding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an inspiring object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of peoples who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without incurring those conditions of the mind or of the body politic, which lead to war.

**Probe Working Of The Brain**

**Use High Radio Currents To Stop Functioning Of Limited Areas**

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department.

Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and physiological problems in which a small controlled elimination of function is desired.

**Husband Needed Sympathy**

In granting a divorce to a talkative woman at Toledo, Ohio Judge James Austin explained that it was given "as a favor to her husband." Mrs. Nothaft V. Mueller could not be stopped by judge, attorneys or bailiff after she began a recital of her domestic affairs. The husband did not contest the action.

**Looseness Of The Bowels During the Summer Months**

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels.

Generally it develops into Diarrhoea, Dysentery, or Gastric Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr.

Fowler's" when you ask for it.

Put up only by The T. Mihurn Co., Ltd., Toronto, Ont.

**Modern War Implements**

**Britain Installing Rapid Fire Gun In Fighting Planes**

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the hornets. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards." Presumably, given British air fighters a fast start over all competitors in the armament race. But the presumption lingers before the announcement that the new device was developed by experts connected with one of the great armament manufacturers, whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be cut with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster. Detroit News.

**Praises Missionary Efforts**

**Doctor Credits Christianity With Great Progress In Asia**

The change which Christianity brought in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclere, South Africa, by Dr. J. R. Moffatt, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the missions.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mrs. Moffatt threw up her hands, "I am," he said with determination, "taking it to the nearest police station."

**Fortune Has String Attached**

**Man Must Marry By Christmas**

**To Inherit**

If John Francis Gallagher, of parts unknown, takes unto himself a wife on or before Dec. 25, 1938, and sets down to home life he will receive \$100,000 from his aunt, Mrs. Sarah, 143 West Hall Road, Eltham, London Eng.

The offer of wealth was disclosed in a letter from Mrs. Sarah to Acting Major J. A. McKechnie of Wimbley. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Sarah, in her letter, said the last address she had of her nephew was box 130, Carlton, Alta., and general delivery. Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Sarah said she would bequeath all her real and personal property to the church and charity.

**Gift For British Admiralty**

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he saved the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

When you smoke plug tobacco, you can cut each piney fresh when you want it—and you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

PLUG SMOKING TOBACCO

**Regular White Elephant**

**Automatic Give Minister From India Lots Of Trouble**

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Cruiser, with a 45 culture and temperance revolver.

The revolver became a source of trouble to Mr. Moffatt before he left England. The weapon was taken away by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oldham.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mrs. Moffatt threw up her hands, "I am," he said with determination, "taking it to the nearest police station."

**Fixed Price For Tobacco Growers**

**Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement**

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario flue cured tobacco growers are now practically insured for 1934 a price based on 27c per lb., for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

**Proved Idea Wrong**

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

**Population Of India**

**Showed Increase Of Thirty-Four Million In Ten Years**

Dr. J. H. Jutton, CIE, ICS, chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated.

The census of 1931 gave India a population of 353 millions or an increase since 1921 of just under 34 millions. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to 400 million, the mark which was envisaged by Sir John Megaw, cannot be dismissed as impossible. Calcutta Statesman.

**A Miracle Of Speed**

**Nineteen Girls In London Factory Make Shirt In Minute**

A shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sees cuts, another makes collars, another button-holes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

"Minnow" submarines weighing only 12 tons and measuring 29 feet in length have been given successful underwater tests in Japan.

### Take Care of Your Brakes.

That car owners must pay more attention to the condition of their car and general safety of driving was evidenced recently by a Calgary court when Ernest G. Mullett was fined and had his driving license suspended for three months for driving a truck with defective brakes.

J. C. Colpitts, owner of the truck and employer of Mullett, was assessed \$5.00 for allowing a truck with poor brakes to be driven by one of his servants. In addition to the suspension of his license Mullett was fined \$3.00 and costs.

In passing judgment on Colpitts, the magistrate pointed out that although there was no actual blame attached to him for the accident, there was a certain amount of responsibility.

The accident occurred in Calgary when the truck struck and injured Reginald Hayes on July 16th as he stepped from a street car.

Carelessness in neglecting the care of brakes is responsible for many of the accidents we read about daily, and a car so neglected is a menace to human life every time it is taken out of the garage. A few more stiff fines and the suspension of driving licenses will do much to remedy this evil.

### Baseball Comments.

Didsbury baseball fans saw plenty of action and got full value for their money at the last baseball game, when Hainstock eliminated the local team from the Rockies League play-offs. Taking the lead in the first inning and being ahead during most of the game it looked like a Didsbury win, but the gods decreed otherwise. Playing in the dark Hainstock got onto the slants of George Geiger and smashed his curves all over the lot for a total of six runs in the final inning. It was a tough game to lose and a disappointment to the fans, the majority of whom fully expected a Didsbury win. The game should have been called at the end of the 7th inning on account of darkness, and if this had been done Didsbury would still be in the league playoffs. No team can be expected to field balls when it is so dark the ball cannot be seen.

### Verified.

Many of the well-worn jokes on the medical profession lack solid basis, but the one about leaving the surgical sponge inside the patient has just been verified:

Warden Laws of Sing Sing prison was recently operated for a tumor. Instead, the surgeons found a sponge which had been overlooked in a previous operation.

### WEEKLY JOKES

Suitor (sighing): "Well, since you don't want to marry me after all, perhaps you'll return my ring."

Girl (slyly): "If you must know, your jeweler has called for it already."

### Field Day for Junior Farmers Lacombe, Aug. 6

In the "boom days" when towns and cities were making their mushroom growth many of the finest young men and young women were drawn away from the farm. Booms are always dangerous, and now in the reaction hundreds of these men and women are among the unemployed. The majority of boys and girls now growing up on farms will, perchance, make farming their work. During the last ten or fifteen years great improvements have been made in farming methods.

The margin of profit in farming is always very narrow, but while very few farmers make fortunes all good farmers are in normal times assured of a good living, and one of the most comfortable and independent methods of living. With boys and girls now qualified to help clubs, judging classes and short courses, training at the provincial schools of agriculture, and for a few a course in agriculture and home-making at the University, farm boys and girls today have opportunities which their parents and their older brothers and sisters never had.

A vital factor is to get these young people interested in better farming methods, good seed grain and good livestock, and in the improvement of their farm homes. Nowhere can this be better done than in the inspiration from a visit to the Dominion Experimental Station at Lacombe. The program for the Junior Farmers' Boys' and Girls' Club on Monday, August 6th will give an opportunity to see the many branches of experimental work including horticulture, bees, poultry, grain and forage crops, cattle, swine and horses.

An invitation is extended to all the older boys and girls and young men and women on farms to visit the Experimental Station for this special field day. The program has been planned particularly for the young people, but parents are urged to come with their boys and girls. Bring food for lunch and supper. The Station will provide coffee, cream, sugar and cups.

## Window sill refrigeration....as impractical as window sill cooking.

- Cooking with the sunshine on the window sill . . . of course you'll agree it is quite ridiculous.

- It is equally as ridiculous for anyone to expect efficient, safe refrigeration from a box suspended outside a window with foods facing the elements, freezing and thawing, as temperatures rise and fall rapidly.

- With an ELECTRIC REFRIGERATOR you can be positive of food safety over a period of several days, enabling you to buy in quantity when special prices prevail without fear of spoilage and possible danger to health.

- Such economical purchasing and the low operating cost will soon return the actual outlay for an ELECTRIC REFRIGERATOR.

For July 28th, 1934.

Prospects held forth three weeks ago for a heavy crop of wheat this season in Alberta have been reduced to失望. The hot, dry weather which has prevailed over the southern and eastern sections of the province within the past fortnight, unrelied by rain save in a few localities. Nevertheless, while it is certain that the total wheat yield will not be heavy, the conditions over most of the province are still sufficiently favorable to assure a fairly substantial total yield of grain. Sunflower crops even in the driest sections are holding up remarkably well and will give a fair yield, while in some southern wheat districts and in the arid areas of the province the prospects are for very good yields.

The area chiefly affected with adverse weather conditions has been that in Crop Districts 5 and 7, from Wainwright south to Empress and westward to Hardisty, Coronation and Drumheller. In this area the results from May drought and grasshopper ravishes brought about by June rains has been largely offset by the hot, dry weather in July, with further serious damage by hoppers. There are still some good stands of grain on sunflower-filled fields in the area mentioned which will yield a fair crop, but the balance may be described as a failure. The department is strongly urging farmers whose prospects are for a poor yield to cut what crop they have for feed purposes, which is already being done in many cases.

With respect to the remainder of the province the situation varies considerably. Some of the southern areas undoubtedly give prospects of producing good crops, notably south and southwest of Medicine Hat, in the Foremost district, in the areas surrounding Lethbridge, in Magrath-Castor, and similar areas along the western side of the prairie, and in Calgary, which were benefited by further rains during the first part of July. Hot, dry weather is now prevailing in these districts, however, and this is retarding the filling process.

North of Calgary from Didsbury to Wetaskiwin, 40 miles south of Edmonton, the country generally has not experienced its normal rainfall, and while there are still some fair stands of grain, they are suffering from the present hot, dry spell, and will show reduced yields if rain does not come shortly. Frost early in July also did some damage in one or two districts in this area.

Throughout the Edmonton territory east and northeast to the Saskatchewan border, with a few minor exceptions, and in the northern districts, conditions are very favorable, and the present weather is what has been needed to aid the grain-opening process following continued rains. Present prospects in these areas are for yields above the average.

All wheat is now ripening rapidly and prospects are for a fairly early harvest.

**England Retains Davis Cup**

Fred Perry, English tennis star, Tuesday defeated Frank N. Shields, in Canada, in the finals of the coveted Davis Cup, world-famous tournament.

In retaining the Davis Cup, (for the second year in succession) England is once again supreme in sports, having tucked the following honors under her belt:

British Open, Henry Cotton, Wimbledon Tennis Championship, Fred Perry.

Wimbledon Ladies Tennis Championship, Dorothy Round.

Davis Cup, Fred Perry (2nd year in succession).

In addition to these several boating and other records have been made by English athletes.

It only remains for England to beat Australia in the cricket tests to be the reigning power in the realm of sport.

**WORLD HAPPENINGS  
BRIEFLY TOLD**

New motor cars on the roads of the United Kingdom in March numbered 43,735 as compared with 33,746 in March, 1933.

Charles S. Thomas, 84, who capped a stormy career as United States senator and governor of Oklahoma by defeating President Roosevelt's 1933 order against gold hoarding, is dead.

Canada's greetings were extended to the Prince of Wales on the occasion of his birthday, June 23, by the Governor-General, the Earl of Bessborough.

Henry Lawson Royle, 16, attempting his first flight at Hebburn airport, Yorkshire, crashed and was burned to death 10 minutes after the take-off.

Dr. Wm. Boyd, professor of pathology in Manitoba Medical College, has accepted a similar position in Stanford University, California. It was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture estimated that the drought will cause European wheat harvest this year to fall short of 1933 by 260,000,000 bushels. The 1934 harvest is expected to total 1,470,000,000 bushels.

Rev. Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London that Great Britain should disarm even though she is alone among powers in doing so. Any alternative policy, he argued, might lead to war.

The Rotarians, 10,000 of whom were welcomed to Detroit, representing 86 nations and nearly as many languages and political philosophies, they assembled for the 29th convention of Rotary international.

Nawak Kazimierz, Polish newspaperman who left Warsaw many years ago to get material for a book has arrived at Cape Town after pedaling across Europe and down the length of Africa on a bicycle.

**Able To Store Oxygen**

Theory That Human Body Can Store Up Oxygen Is Advanced

Experiments on Albian rats that demonstrated the human body is able to store oxygen and may help show men how they can condition themselves for flights into the stratosphere, were reported before the American Association for the Advancement of Science.

Professors Harold B. Robertson and Francis Marsh Baldwin, University of Southern California physiologist, told of the experiments.

The discovery, first suggested by Leonard Hill, British scientist, was credited with additional importance because of a contrary theory the human body uses up oxygen as fast as it is taken in through the lungs that in a large measure, each breath must supply the oxygen requirement of the individual as he exists, and at approximately the same time that inhalation takes place.

This latter theory has been the premise for all investigations to establish the level of basal metabolism in human beings.

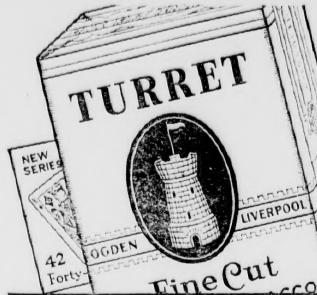

**To Be Congratulated**

Three Canadian Recipients Of King's Honors Are Over Seventy

Honors falling to three Canadian writers call for respectful congratulations. Dr. Charles G. D. Roberts, senior professional author, has become president of the Royal Society. Duncan Campbell Scott, poet, is a C.M.G., and Miss Marshall Saunders is wearing an O.B.E. at a risk of angle. The facts remind us that, if longevity is not the chief scriptural virtue, it is at least essential to recognition in this country. These distinguished persons, who have long brought honor to the craft by their labors, scale in age from 72 to 75 years. Long may they live to enjoy the homage of everyone!—Toronto Mail and Empire.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

**ASSISTING NATURE**

By JACK MINER

During the past year I have read nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canada, North America, was given by millions of wild buffalo (Bos bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was established to save the species from extinction, slaughtered the great upside-down, made it into one of the largest and most valuable parks in the world, and towns and cities and stately governmental buildings dotted here and there across its vast expanse. In order to bring about this state of things, man had to interfere with Nature, as some would call it.

And speaking of wheat-fields, wheat has been man's favorite food for centuries. Yet when wheat was being grown in Canada in comparatively recent years, had certain weaknesses. It had to be planted in the fall and did not always grow well, especially in the cold, wet, winter. It was not produced as abundantly as seemed most desirable; it did not mature rapidly enough always to escape early autumn frosts. Then came to our aid Professor Charles Saunders, cerealist of Ottawa, and by study, experimentation and the right selection of choice grain varieties, and a result that could yield several bushels more per acre than had been the rule previously, that would mature within a certain time, and not be subject to all its former qualities. We have today the Marquis and the Garnet and other species of wheat, developed by man. God created the original, and man has interfered with Nature to develop them.

Much the same thing is true of the horse, different strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy farm work, and the Shetland, pony, and the Arab, descended originally from the wild stock for racing.

Recently I was in some of the southern United States, where the character of the farm work is very different from here. The common ass, yet where the climate is too warm to permit the horse doing its best. In that part of the continent where the horse is not used with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has a mile to the mile but the mule kicked and so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that the hen is the mother of man that has developed the different breeds Leghorns, Brahmans, Minorcas, Plymouth Rocks, and so on, some of which are especially valuable as layers, and others as food. Our much prized turkey is nothing more

but let us look at another side to the question. At the same time that God created the little wild rose, He created also the weed typical of which is the Canadian thistle. Still the good man, the wise man, and the means of controlling these also, so that they may be restrained from predominating the plant world.

In your orchard are many varieties of fruit trees, such as the Stark Delicious apple, the Northern Spy, and other varieties? No. He gave man the little wild crab, and the hardy pear, which is a miniature apple, growing and fruiting the moment we helped what we have to-day. Yet, according to some people's statements, if you kill the mice that girdle these fruit trees when they are small, you will have a wild, or upsetting, Nature's balance.

If you are raising poultry, or other bird life, and hawks begin to attack live on your birds, and you fail to tame them and drive away the hawks, then you are not using the brains God gave you.

If your clothing were to become infested with worms or your dwelling with rodents you would destroy the insects or animals that were troubling you. Yet if they were consistent in their argument, these people would have explained that since you were upsetting Nature's balance, since God created all these creatures at the same time. Or how about the dry bones of typhoid? Do you control it on the ground, let it play?

Personally I think God gave man "dominion over all these things," and it is man's duty to act in accordance with His wishes. He gave man the balance of Nature, and if you control it on the ground, let it play, personally I think God gave man "dominion over all these things," and it is man's duty to act in accordance with His wishes. He gave man the balance of Nature,

As for me, I thank God for all He made for the raw materials He gave us with which to work; those He gave us in His own words, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us new knowledge. He has given to illustrate my meaning, allow me to quote the poem "Making a Garden", written by John M. Thomas:

Man ploughs and plants and digs  
and weeds.  
He works with hoe and spade;  
Cuts trees, and plants the field and rain and air,  
He must be proud what fills the soil  
And turns the heavy sod;  
How wonderful a thing to be  
In partnership with God!

I say, He wants all of us to be partners.

**Never Shows Correct Time**

Silesian City Clock Has Been Fast  
For 659 Years

Goritz claims a distinction which is probably unique. A clock in this ancient Silesian city has not shown correct time for over 650 years. In 1953 a conspiracy was formed to murder the councillors on they left the town hall at noon. Conscience, however, overtook one of the conspirators, and he put the clock forward seven minutes. As a result, the would-be assassins arrived on the scene too early and were arrested by the watch. To-day the clock is still kept seven minutes fast in memory of the councillors' escape.

**Little Journeys In Science**

**THE ICE AGES**

(By Gordon H. Guest, M.A.)

Niagara Falls and the Great Lakes, vacation paradise to many from the western plains, are legacies left to us from the last great ice age, which enveloped this continent many thousands of years ago. Once looked upon as great catastrophes because they destroyed life and defaced the earth's surface, the ice ages are now considered by geologists to have been not entirely destructive.

It is thought that there have been four "ages of ice" in the geological history of the world, each lasting for many thousands of years, and bringing about great changes in the earth's surface. The last ice age is believed to have covered about 12,000,000 square miles, and of this, 6,000,000 square miles is still under ice. It is notable, however, that the world was never entirely covered with ice at one time, and thus life was always preserved, to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice encrusts large areas of the earth's surface and all forms of life in these regions become extinct. The condition is brought about by "ice caps," huge blocks of ice formed by piles of snow which partially melt, congealing to form ice, and slowly spreading further and farther.

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

A woman's intuition is more powerful than a man's knowledge.

## HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Werle's Powder. And when you're a tooth - how nice so tight they can't move and act like your own. Keeps mouth sanitary, breath pleasant. Special comfort-easement prevents sensitive gums from getting sore. Small cost - any druggist.

## Occasional Wife

By EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

### SYNOPSIS

Camilla, Helen and Peter Aspin, young and in love, marry secretly, deciding to live their two lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship when Camilla, his adopted daughter of a wealthy family, she is not to inherit money when she comes of age, and she is struggling financially. She has given up the idea of landing an agency job. Others in the story are Avis Werle, another wealthy girl who is trying to win Peter away from Camilla; Tom, Peter's old friend, and Gus Watson, his former roommate with whom he has quarreled. After a party at an exclusive club where Camilla has been invited, Peter goes to a cabaret to continue the gaiety. Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they wake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to leave before the party that she and Peter are attending. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they separate. After Camilla has gone to the studio, Avis Werle calls and persuades Peter to accept a loan of \$1,000. Peter refuses his offer and asks Avis and Camilla for suggestions as to what to do for it. Camilla suggests "Eager Youth" and Avis "Inscrination." Peter adopts the latter title and Camilla the former. He goes to Peter's studio for quiet work and Avis and Camilla follow later, and as the lights are turned on see the statue has been shattered to pieces. Avis and Camilla are shocked. Camilla, stunned by the disaster and hurt by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

### (Now Go On With The Story)

### CHAPTER L

Avis was one of the first visitors at the museum when the exhibit opened the following week. Her eager, anxious inspection of the vast gallery filled with sculptured pieces might have indicated that she was one of the most ambitious of the entrants. Her eyes scanned one side of the room hurriedly, darted to the other end. Even in that brief interval of suspense, her heart sank heavily with the dread of disappointment, before her eyes found that object for which they were searching impatiently.

Yes there it was. Peter's "Land of Hope" had made the exhibit. It had been accepted for display with the best by the selecting committee. She crossed the room quickly to examine the card which hung from the modell group. The data was accurate. There would be another week of suspense before the final award of the scholarship prize. She must help Peter to endure it, somehow. Of course, she hadn't much hope now for Peter's chance of the reward. She was only happy for him that his piece had been accepted. That should encourage him.

W. N. U. 2054

Besides, she now had an alternative to her first plans involving his removal to Paris. How fortunate that she had thought of suggesting that Peter could do some work for her to meet his term from her. Had she made the suggestion now, he might have suspected that her pity prompted the plan. As it was, she already had arranged for his services if he did not go to Paris.

The idea presented two advantages: instead of relieving him of his indebtedness to her, it would practically double his obligation to her, by virtue of gratitude. Not only would Peter feel obliged to her for the timely loan of money, but for the opportunity to repay it with his every work. She also would see that enough admiring friends placed orders to add considerably to that obligation. So, she still held the advantage even without Paris. That would be but a simple step when she had won Peter completely.

Paris, Rome, Athens - everything would be theirs to command. Then her thoughts merged into the present tense, so confident was she of the future.

So engrossed was she in her plans that she almost collided with Peter in the corridor as she was leaving the exhibit room.

"Peter!" she exclaimed. "It's I! not even granting him the thrill of discovering it for himself."

"It's the gleam which lit his eyes betrayed his exult. 'I'm surprised.'

"Oh, I'm not. It is a marvelous thing but..."

"I know. You might as well say it has no chance with the others."

"Why, no," she denied. "Would you believe it, I have been in there for 10 minutes looking at that piece that I have seen dozens of times before, and I didn't even notice the other entries?"

He grimmed belligerently. "You are pre-judged, madam. You would make a fine judge, now, wouldn't you? Come back with me, and we'll see what else there is to see."

As if she would refuse! She cared nothing about comparing the talents of his contemporaries, just to walk beside Peter anywhere, to share anything with him, was sheer delight and an adventure.

She led him to his own work and he read with a strange rush of exultation the prosaic words of information on the classification card. Obviously, it was not important; but to Peter it represented a goal toward which he had been striving for four long, arduous years. He had not intended that it would be just like this, but at least, his work had met with the approval of the judges well enough to be in the display. It was a small personal triumph which portended much more than appeared on the surface. He had not worked in vain.

For a moment he forgot that he was not alone, so far did he withdraw into his own secret thoughts. Avis, the room, and its other occupants, the scores of plaster figures all about him, receded into space; and he was alone with his little moment of personal triumph.

Camilla was the first to intrude into that sanctuary of his thoughts, and it was almost as if he would speak with her that he turned toward Avis. Thus abruptly returned to the time, place and reality, his face clouded for an instant, like the sun is dimmed by the sudden passing of a small white cloud.

His comment was changed to, "Well, it's there!" with a long sigh of near-satisfaction. "Now let's see what argues with it." His critical eyes roved over the room. "Shall we try to prove the winner?"

They roamed about the room, commenting, admiring, criticizing. Avis favored only the symbolic figures such as Peter had prepared to enter. But Peter admired an excellent bust of the city's leading citizen, Andrew Hawlock.

"It's absolutely marvelous," he declared. "You not only seen pictures of him, but I've seen Hawlock himself, talked with him. It is the truest likeness of a human being that I've ever seen in plaster." He turned around. "That sea gull with spread wings is a beauty, too; every line is rhythm and motion, but I doubt if it has a chance against this bust. I don't think there is a nude figure here that can compare with either of them."

"Then what about 'Land of Hope'?" she reminded him.

"On that! It's completely out of the running. I am going back to work, in earnest. At least, this much has inspired me. By the way are you in any hurry for your stuff?"

"Not if you have something more important to do. I can wait."

"Not at all. I just want to know where to begin. I'm at your service, if you say so."

"I do say so!" she declared. "How about coming to tea at my house tomorrow and consulting with mother about the garden piece first. You can get them modeled and while doing the stone work you can fill in my thoughts at the studio."

"Fine," he agreed. "You're a great planner, aren't you?"

"Plans are only great if they work to the proper advantage."

"And what is that advantage?"

"Your success. It all depends on you," she replied, with more significance than she knew.

"That suits me."

They were standing outside now beside her smart coupe, parked at the curb. "I'll drop you at the studio," she suggested.

"Thanks a lot. But I'd rather walk to help work off some of that newly acquired enthusiasm. Too much at one time is bad for the mental balance. Did you ever feel giddy with inspiration?" Well, that is my present condition," he grinned. "Besides, I want to drop in somewhere right away and phone Camilla the good news. She will be anxious to hear. I promised to let her know as soon as possible."

Avis set her teeth hard over his loyalty to Camilla. It had not wavered since that fateful moment on the night of the tragedy. Nor had she dared mention to him the incident, even to learn what his reactions had been, or what they had said to each other. There are some forbidden places into which even the most audacious and unscrupulous may not enter. She would just have to be patient and await the outcome. Her campaign was now prolonged and confronted with added difficulties. But she was a good warrior who never admitted defeat.

"Well, so long," she waved gayly, and darted away with a roar of the powerful motor.

Camilla was jubilant over Peter's announcement. "I knew it would get in," she told him. "Congratulations, darling. I have a little special dinner all prepared to celebrate tonight. Be there at six, will you?"

"Okay, sweetheart. But you took a pretty long chance getting that celebrated ready before the victory, didn't you?"

"I disagree. It was a sure thing. But even so, a celebration was in order. It is quite an event to have you for a dinner guest, even."

He laughed. "You won't think it's an event when you have to face me across the dinner table every day for the rest of your life," he warned.

"It won't. It will be paradise," she declared.

(To Be Continued)

### Another Useless Invention

Cellophane Liner For Bathtub To Eliminate Rings

"No more rings around the family bathtub."

This is the promise held out by Robert L. Innis, Long Wharf ship model maker, who, in spite of the handicap of having a crippled arm, has patented an invention which should do much in the way of preventing domestic discord arising from those rings which add nothing to a bathtub's beauty.

The invention consists of a specially treated waterproof cellophane lining which can be instantly loosened from the inside of the bathtub by means of a rig-cord when the bather is through.

### Ask Mother— She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and downcast... kept her on the job through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S  
VEGETABLE COMPOUND

### China's Adverse Trade

Great Outcry Is Made Against Use Of Imported Goods

In view of the fact China's adverse balance of trade this year promises to run to at least \$700,000,000 there is a great outcry in the country against use of imported articles of all kinds.

It is admitted foreign goods and foreign coin must be imported as necessities, but other foreign-made things from automobiles to chewing gum, are now being denounced as "useless luxuries" by the Chinese language press. Incidentally, China imported \$2,000,000 worth of chewing gum last year, and the patriotic newspaper says most of it was consumed by "young Chinese women who are dance-mad."

Joining the present campaign against use of foreign-made goods, many organizations are passing resolutions pledging all members to use only Chinese made products. The entire staff of the ministry of railways at Nanking, for instance, has sworn a solemn oath to wear nothing but made-of-native materials.

Chinese women are objects of particular attack in this campaign against foreign goods. The women of the treaty ports, and those who adopt a semi-foreign mode of life and dress, are being particularly denounced as unpatriotic.

### Sink Great Shaft

Would Bore Deep Hole In Earth To Tap Unlimited Power

The boring of a great hole into the earth, with all mankind lending a hand to the job, was suggested before the American Association for the Advancement of Science in a paper prepared by the late Dr. C. E. Grunsky, president of the California Academy of Sciences.

The paper was read by Dr. F. N. Metzger, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 6.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gaseous pressures of 900,000 pounds a square inch would be the reward.

Dr. Grunsky did not conceive that man could burrow down very closely to the central core of the globe but suggested a great co-operative effort would result in penetrating the outer crusts to a vastly greater depth than ever before—depths they could be reached which would tell science many valuable things.

### for BRUISES

There's nothing to equal Minard's. It "takes hold". Antiseptic, soothing, healing. Gives quick relief!

### Little Helps For This Week

"I would have you without carefulness." 1 Cor. 13:7, 32.

O Lord, how happy should we be If we could cast our care on Thee. If we from self could rest, And feel at heart that One above, In perfect wisdom, perfect love, Is working for the best.

Cast all they care on God, See that all thy cares are such as thou canst cast on God, and then hold none back. Never trust in thyself, never step short in thyself, but cast everything, even this very care which distresseth thee upon God. Be not anxious about little things, if thou wouldst learn to trust Him with them all. Act upon faith in little things. Commit thy daily cares and anxieties to Him, and He will strengthen thy faith for greater trials. Rather give thyself into God's hands and so trust Him to take care of thee in all lesser things as being His, for His own sake, whose thou art. E. B. Pusey.

### Seems To Be Unwise

Manchester Guardian Comments On World Destruction Of Food

In any case, to an economist from some other world, the whole idea of restriction—that is the deliberate destruction of food and raw materials whether under the direction of Mr. Bruce or of Mr. Elliot or of Mr. Roosevelt, would appear fantastic. In nearly every country during the past few years, in the name of gold standards or balanced budgets, the standard of living of the mass of the people has been steadily forced down. Even in the pre-quotient era in Great Britain signs of malnutrition among children were not lacking. Do we then encourage the farms of the New World to send us cheap bread, butter, and meat? No; we invite them to destroy it. The word has gone forth that cheap food is a curse. Manchester Guardian.

### Strange Dictionary

Smithsonian Institution Compiling Record Of Indian Sign Language

The strangest dictionary ever compiled, listing not words but signs, is being completed at Washington to rescue from oblivion the Indian sign language which was once North America's "universal tongue" from coast to coast. Hundreds of signs and their word meanings are being listed on cards by Smithsonian institution scientists with the aid of Richard Sanderville, 70-year-old Blackfoot Indian, one of the last of his race who knows the sign language.

### The Canadian Shield

The central part of Canada is underlain by a great expanse of very ancient, hard crystalline rock known to geologists as the Canadian shield. This has an area of about 2,000,000 square miles or more than half that of the whole Dominion.

Even small towns and rural districts in South Africa are feeling the prosperity wave.

Making a noise is one of the leading infant industries.

## LOCAL & GENERAL

Mr. and Mrs. Lee Sanderman were Sylvan Lake visitors this past week.

Scratch pads—useful for school, store and telephone—2 for 5 cents at Pioneer Office

Jeff and Jack Ratcliff, Edmonton are visiting at the home of their aunt, Mrs. W. H. Chamberlin.

The Misses Emily, Ruth and Joyce Moyle left for a vacation at Sylvan Lake on Wednesday.

Mr. George Darroch of Lacome was the guest of Mr. Carlton Leeson last week.

Mr. and Mrs. W. S. Durier and daughters returned home Tuesday night from a very enjoyable holiday at Sylvan Lake.

Mrs. Maddocks of Edmonton is spending a few weeks here at the home of her daughter, Mrs. W. H. Chamberlin.

Mr. and Mrs. C. D. Casey and family have leased the Durier cottage at Sylvan Lake for the next two weeks.

Mr. and Mrs. E. Bahr and family left Wednesday morning for Banff where they will spend a few days' vacation. Mr. E. E. Bahr has charge of the Banff elevator during his father's absence.

## Westcott Notes.

The July meeting of Westcott WI. was held Friday afternoon at the home of Mrs. Irene Levogard. The meeting opened with "O Canada," and roll-call was responded to by naming a country which belonged to the League of Nations. A Hawaiian guitar selection by the Misses Fletcher and Levogard was greatly enjoyed.

Mrs. A. M. Robertson gave a very instructive paper on the League of Nations. Community singing and a contest rounded off a very pleasant afternoon. The National Anthem was then sung and lunch served.

The August meeting will be held at the home of Mrs. Roland Webster.

Miss Edith Webster left Tuesday for Banff where she will spend the month of August as a student at the Banff School of Drama, taking a course in dramatics and voice production.

## Mountain View Notes

Mr. and Mrs. Rae Armstrong of Olds were visitors at the home of B. A. Atkinson on Sunday.

Several housewives have been out in search of Saskatoons, and were most delighted with the berries they were able to bring home for their winter store.

## Burnside Notes.

Lone Pine W.L. will meet Thursday next at the home of Mrs. O. Turniclife, when Mrs. Wm. Lyons will take the topic, "The League of Nations."

Burnside U.F.A. will meet next Monday evening, August 6, in the Lone Pine Hall. Several speakers will discuss the subject, "Social Credit." From another angle."

Don't forget the novelty dance in Lone Pine Hall on Friday evening, August 10.

Mr. and Mrs. H. Henke, Mayton, spent Sunday with Mr. and Mrs. D. Thomas.

Harold Thompson spent Sunday with Robert Eckel.

A very quiet but pretty wedding took place at the home of Mrs. Nellie Flatt of Olds when her youngest daughter, Lorraine, became the bride of John Viney, eldest son of Mr. and Mrs. Harvey Viney of Alingham. The Rev. James of Olds officiated. The bride was attended by Miss Mina Viney as bridesmaid, and her sister Mrs. Geo. Hammer as matron-of-honor.

The groom was reported to be Mr. Harry Price. After a short wedding luncheon the happy pair left for Banff for a short honeymoon.

We extend congratulations and best wishes. A wedding dance will be held in Lone Pine Hall this Friday evening.

## LOCAL & GENERAL

Mr. and Mrs. Russell Berscht were Banff visitors last Sunday.

Mr. Jim Morris spent a few days in Calgary this week.

Mr. Caldwell of Oyen is spending a few days here, the guest of his sister, Mrs. H. Cates.

Good quality writing pads of first class paper.—100 sheets per pad 25c.—Pioneer Office

Mr. and Mrs. J. Boorman and family are spending a two week vacation at Lacome and Gull Lake.

Mrs. W. G. Evans and Mrs. A. R. Kendrick were Sylvan Lake visitors over Sunday.

Mr. and Mrs. C. E. Marcellus were visitors at Queenstown over the past weekend.

Mr. and Mrs. W. A. McFarquhar are holidaying at Jasper National Park during the present week.

Mr. and Mrs. J. W. Halton and children left Wednesday for a few days holiday at Pincher Creek and Waterton Lakes.

Mr. and Mrs. Russell Berscht with Dr. and Mrs. Kenny of Olds are camping on the Red Deer River this week.

Mrs. J. Piper and children of Turner Valley are visiting for two weeks at the home of Mr. and Mrs. Nyk Hunspurger.

Mr. and Mrs. Frank Mortimer of Calgary have been the guests of Mr. and Mrs. J. H. Fleury during the past week.

Messrs. J. A. McGhee, C. R. Ford and Thos Johnson left Sunday for a week of fishing and camping in various parts of the west country.

Don't miss the big parade next Wednesday. Fancy costumes, floats, decorated bicycles, clowns and children all led by the Didsbury band will unite to make this one of the biggest events of the year.

Mr. Melvyn Hugot and Miss Nola Finley motored to Turner Valley last Thursday where they enjoyed a two day visit at the home of Mr. and Mrs. Brownie Finley and family.

Don't forget the big sports day next Wednesday, August 8 at the base ball ground. The Band is making every effort towards providing fun and entertainment for all.

Charlie Cook is renewing acquaintances with his many friends here. Charlie is relieving at the local C.P.R. station for about 6 weeks while the local staff takes its vacation.

Friends of Mr. Chris Mack were pleased to see him out on the streets Saturday night and congratulate him on being able to get around again.

Mr. and Mrs. W. G. Liesemer and Miss Evelyn left Thursday for a three weeks trip to Portland, Seattle, Vancouver and other coastal points.

A meeting of those interested in the study of Social Credit will be held on Tuesday evening, August 7th at 8 o'clock in the basement of the Public School, with the object of organizing a group in the Didsbury district. Everybody welcome.

Word was received by Mrs. J. W. Rupp of the death of her father, Mr. W. J. Waters of Hayward, California who died at the age of 72 years. Mr. Waters had many friends in Didsbury while visiting his daughter and son-in-law two years ago.

Sid Morasch, who is still in the Calgary Hospital, underwent an operation for the resetting of his leg, Monday. It was found after a previous operation that the leg would not heal, making another operation necessary. Sid would appreciate a visit from his Didsbury friends.

Mr. and Mrs. E. T. Sharman and family left Wednesday for Red Deer where Mr. Sharman will take over his new duties as agent of the United Grain Growers elevator. Mr. H. J. Freisen of Vulcan who takes Mr. Sharman's place at Didsbury has moved his family and is in residence in one of the Perrin houses in Lethbridge.
